

For first to third grade elementary school students

For all children to live with peace of mind

Mie Prefecture
Children's Ordinance

Digital version

Do you have these problems?

People say bad things about you because you're different

Nobody should bully or be unfair to anyone because of the color of their skin, boy or girl, ways of thinking, body, or money.

There is nowhere you can relax
There are no parks where you can play how you want

People protect children from bad and dangerous things. Children can grow up healthily.

Adults don't listen to what you think because you're a child

Children can tell adults how they feel or what they want to do. They can take part in school activities and local activities. In our society, the thoughts and feelings of children are precious.

You have nowhere to go to talk about problems

The thoughts of children are precious. Adults think what is best for children first when they think about things.

Children have many rights, like adults.

There are some rights that only children have.

The Mie Prefecture Children's Ordinance was created because the rights of children are precious, and to make sure children can be healthy.

The Mie Prefecture Children's Ordinance is a promise between Mie and local people, to make sure all children in Mie can live with peace of mind.

Mie is doing these things for children

We stop abuse, bullying, and other things

We give support so children can grow up healthily

We listen to children's problems

We make systems to protect the rights of children

The thoughts of children are precious to us

We make sure that everyone can learn about the rights of children

We support families with children to make sure they can live with peace of mind

Rights are things that we need to live happily in our own way.

Everyone in the world has the same rights from when they are born.
